Algebra - MATH

If you are asked to fill in the box, you can do the simple arithmetic and know that the answer should be 3.

Now we are ready for basic algebra.

Let's substitute the box with the letter 'k' and we have: $5 + k = 2 \times 4$. In the equation above, the letter 'k' is known as a variable.

Answers in algebra and other advanced forms of math aren't always round, easy numbers. They can often be decimals, fractions, or irrational numbers. A calculator can help you find these complicated answers, but keep in mind that your teacher may require you to give your answer in its exact form, not in an unwieldy decimal.

Pre-Algebra - Mathplanet

“Algebra” means, roughly, “relationships”. Grade-school algebra explores the relationship between unknown numbers.

Without knowing x and y , we can still work out that $(x + y)^2 = x^2 + 2xy + y^2$. “Linear Algebra” means, roughly, “line-like relationships”. Let’s
