Brock's Injuries of the Brain and Spinal Cord and Their ...

Broca's area, or the Broca area, is a region in the frontal lobe of the dominant hemisphere, usually the left, of the brain with functions linked to speech production. Language processing has been linked to Broca's area since Pierre Paul Broca reported impairments in two patients. They had lost the ability to speak after injury to the posterior inferior frontal gyrus of the brain. Since then, the approximate region he identified has become known as Broca's area, and the deficit in language produ

Broca's area - Wikipedia

Brain injury trust funds established by state governments are intended to create funding to help people with brain injury and their families. If a brain injury trust fund is available in a state, funds may be used to pay for case management, assistive technology, home modifications, transportation, respite short term therapies, and other services depending upon the rules in a given state.

New Jersey | Brain Injury Association of America

The medical literature on trauma of the central nervous system (CNS) has expanded substantially since the last edition of Brock's text was published 14 years ago. Although the current volume resembles its predecessor in format and general subject matter, it is commendably longer and less speculative.
