Creating A Forest Garden Working

The concept of forest gardening is not new to me (and I have a few things happening here along those lines) but this book covers everything and more. There are clear sections covering the ideas behind a working forest garden and also details about numerous plants and how they can be grown in a forest garden setting.

Creating a Forest Garden: Working with Nature to Grow ...

A comprehensive encyclopedia on designing and growing a forest garden...A garden that resembles a woodland and is peopled with edible plants (for the most part not vegetables) shrubs, and trees, as well as plants that provide soap, ink, basket weaving materials, dye, etc. Has, as far as I can see, every thing you'd need to know to set up this sort of garden, including discussions of planning for wind, sun, shade, space, nitrogen and potassium levels required or output by different plants, etc.

Creating a Forest Garden: Working with Nature to Grow ...

Measure the land so you can space your trees. Use a tape measure and trigonometry for a smaller garden, satellite photo & tape for a larger garden. I use the Theodolite app. Also, test your soil for acidity & nutrients; farmers co-ops are cheapest. 2. Plan. Use large grid paper, overlaid with tracing layers.

Creating a forest garden in 8 easy steps

The best way to supply nitrogen into a forest garden system is by the use of nitrogen-fixing plants. By using these plants, which in a forest garden are mostly trees Natural forests do not need feeding – that is obvious. They just grow: trees flower and fruit, and smaller plants usually survive any browsing damage from insects and animals.

Creating a Forest Garden - Agroforestry Research Trust

Forest Gardens are an excellent way to produce food and other resources for humans while enhancing biodiversity by providing a range of habitat for wildlife within the design. They are very enjoyable to design, build and interact with. Creating a forest garden is an intellectual pursuit as well as a physical one.
