Guide Numbers Flash Photography

GN = Subject Distance from Flash Source x f/Stop. Guide numbers are based on a simple mathematical equation that states: the light output of

Download Free Guide Numbers Flash Photography

an electronic flash is equal to the distance of the flash unit from the subject multiplied by the lens aperture, or f/stop.

Understanding Guide Numbers | B&H Explora

Guide number is the oldest system to determine flash exposure (used for flash

Download Free Guide Numbers Flash Photography

bulbs, before automation), but guide number only applies to direct flash. But guide number still is fundamental today, and understanding guide numbers can increase understanding of flash and inverse square law, whether you actually use guide numbers or not.

Numbers, plus GN Calculator

Fast flash durations come at a cost, however, both in price and in 'power' for lack of a better word. A flash's power is determined by its Guide Number, with low Guide Numbers (GN) indicating a weak or less powerful flash than one with a high GN. For ease of comparison, most flash GNs are rated for an ISO 100
