Chapter 1 Learning Theory Summary. In the 1600s, philosophers began to wonder whether humans are machines that operate according to scientific laws. Descartes's distinction between mind and body held that only the body is controlled by such laws. Specifically, the human body (and all animal behavior) is controlled by reflex action.

Psychopharmacology, Second Edition - Sinauer Associates

Whether judged in molecular, cellular, systemic, behavioral, or cognitive terms, the human nervous system is a stupendous piece of biological machinery. Given its accomplishments—all the artifacts of human culture, for instance—there is good reason for wanting to understand how the brain and the rest of the nervous system works. The debilitating and costly effects of neurological and ...
