Our regional anesthesia courses are specifically engineered for the modern anesthesia provider. Twin Oaks Anesthesia seminars specialize in comprehensive AANA approved courses for regional anesthesia techniques with emphasis on ultrasound guidance developed by CRNAs for CRNAs and all anesthesia providers. All of the modern blocks and vascular access techniques are presented in our courses with real images and evidenced-based text, taught by an AANA journal-published CRNA.

The procedure is similar to the previously described in the continuous ultrasound-guided block section in Ultrasound-Guided Cervical Plexus Block. Advancement of the needle in plane in a lateral-to-medial direction until the tip is adjacent to the nerve and deep to the gluteus maximus fascia should ensure appropriate catheter location.

### **Ultrasound-Guided Sciatic Nerve Block - NYSORA**

The block involves tracing the path of the nerve as it follows the femoral artery down the medial thigh and then blocking the saphenous nerve as it changes course and moves superficially beneath the sartorius muscle in the distal thigh. In this position it is “trapped” between adjacent muscles and presents a perfect target for the block.
